How is the school system supposed to protect the rights of a heterosexual student who feels that his or her rights has been violated because a student who identifies with the opposite gender is allowed to use the same restroom or locker room as the heterosexual student?

Is any consideration or research being placed upon the safety of female students when requiring schools to allow athletic participation by students who are anatomically born as males but identify as females. There are biological differences that would place the MAJORITY of females in danger under these circumstances.
