I am writing to express my disapproval of Executive Orders 13988 and 14021. Somehow all people can be respected and treated fairly without trampling all over biological women. Title IX was created to give biological women a place where they could all compete on a fair playing level, changing this is completely unfair to those same women Title IX was helping. Allowing biological males who say they feel like a female access to all things previously open to biological females makes no sense. Young biological females have experienced distress in bathrooms and women's shelters are no longer the safe haven they once were. Follow the science as this administration says, sex does matter in many instances, in science there are 2 biological sexes. No matter how anyone feels there are still only 2 biological sexes, male and female. Make a third category of bathrooms, changing rooms and sports if need be but do not destroy the uniqueness of biological men and women in the process.
