Hello,

I'm writing to encourage you to remove gender identity from consideration in all aspects of Title IX. Femaleness and maleness are empirical reality and people who believe in gender identity have the same human rights based on their sex as others do. To put boys and men on girls' and women's sports teams and in their restrooms and locker rooms out of indulgence of gender identity is to lock girls and women out of those spaces and out of the competition. It is also to subject those girls and women to sexual harassment and assault at the hands of boys and men who usually are heterosexual and keep their fully functional male reproductive organs (penises and testicles) as some 90% or more of male people who identify as transgender do.

The male physical advantage is present BEFORE puberty and continues long after cross sex hormones and even castration. Please read the studies below and save girls and women from a regression of opportunities and rights under the auspices of inclusion.

Males have advantage over women in sports even after 3 years of cross sex hormones

Boys outperform girls athletically as young as 6 years old

Boys and men outperform girls and women in 9-17 year olds

I feel it is important you understand that I am not a conservative thinker or voter but I feel very strongly about this issue and will follow truth over ideology in this elemental point of reality in the ballot box in the future.

Thank you,
