To Whom it may Concern:

Biden's executive orders 13988 and 14021 are not compatible with lived experiences or objective reality. The laws of the US must be written and indeed have been written to reflect biological reality and natural order. You cannot on the one hand provide laws to respect and afford opportunities for the men, women and children of the US and also include the contemporaneous notion of gender ideology which has no bearing in the natural order of humankind and actually usurps the rights of many Americans. I would go as far to say that by supporting the notion of 'gender identity' you are indeed discriminating against the biological reality of individuals members of society by supporting the medical harms of gender medicine. These harms are vast and include cardiac, liver, and kidney problems, shortened lifespans due to poor physical health and shortened lifespans due to poor mental health including a 19 times greater risk of suicide, as well as sterility and countless other harms. There are no definitions provided in these executive orders and attempts to massage meanings to encompass current cultural trends and the medicalization of young people in our country all for supporting the cause of the pharmaceutical industries who have heavily financed your administration is abhorrent.

As a parent who has had a daughter become suddenly transgender identified as a college student, I know firsthand the agenda of the transgender activists, the pharmaceutical industry and the medical industry. The government is complicit in the destruction of America's young people and the truth will one day be known by all. My daughter and countless other girls and boys and young men and women are being used as political fodder to sell a lie.
